Strada Verde

will deliver new revenue, new jobs, and new opportunities for San Benito County

The future of the automotive industry is autonomous and electric vehicles. With Strada Verde, we have an opportunity to position San Benito County as a leader in this growing industry, and bring new revenues to the County. This would include \$6.5 million annual revenue, and a net surplus of \$4 million to the County's General Fund.

Strada Verde is a state-of-the-art automotive research and testing facility that will attract the region's leading technology companies — creating thousands of new jobs and millions in new revenue annually for our schools, public safety, and other community investments.
